

5 QUESTIONS TO ASK BEFORE YOU CHOOSE A MEDICARE PLAN

PRO TIP

Ask your provider:

If this were your parent or loved one, which plan would you choose, and why?

Does this plan cover care in my current (or preferred) long-term care facility?

Make sure your facility is included in the plan's network.

Are my doctors, specialists, and pharmacy in-network?

Continuity of care helps you avoid costly changes in providers.

What will I pay out-of-pocket for hospitalization, rehab, or long-term care?

Some plans have hidden co-pays for extended stays.

Does this plan cover my health conditions and medications?

Look for plans tailored to conditions like COPD, CHF, or diabetes.

If my needs increase, how flexible is this plan?

Will I still have access to specialists, therapies, and on-site doctors if my health changes?

The right Medicare plan is about more than cost—it's about access, quality, and peace of mind. Take this flyer with you, ask these questions, and make the choice that best supports your long-term care needs.
